TECHNICAL SKILLS

Programming Languages: C++, C#, Python, Java, JavaScript, HTML, SQL
Operating Systems: Windows, Linux
Technologies & Tools: Visual Studio Code, Postman, Git, Github, Unity, Docker

EDUCATION

Bachelor of Science in Computer Science and Software Engineering June 2024
University of Washington Bothell

- Cumulative GPA: 3.31
- Dean's List Autumn 2020, Spring 2021, Winter 2022, Spring 2023, Autumn 2023

Relevant Coursework: Data Structure and Algorithms, Analysis and Design, Operating Systems, Network Design and Programming, Cloud Computing, Database Systems

TECHNICAL PROJECTS

Fridge Management Web Application, Capstone March – June 2024

- Built and deployed a Flask-based web application using Python, hosted on Microsoft Azure
- Set up a Microsoft NoSQL Cosmos DB to synchronize fridge contents across multiple devices
- Designed a user-friendly and visually appealing website using Figma
- Implemented Google Authentication to enhance user convenience and security

Relevant Tool/Skill: Python, JavaScript, HTML, Flask, NoSQL, Microsoft Azure, Microsoft Cosmos DB

City Information Gathering Tool, Cloud Computing January 2023

- Developed a Java program that provides city's information based on the user's input
- Integrated multiple APIs to provide real-time updates for a given city
- Implemented backoff logic to handle non-successful responses efficiently

Relevant Tool/Skill: Java, RESTful API

Virtual World Simulation, 3-D Computer Graphic December 2023

- Collaborated with a team member to specify, design, and build a virtual world
- Developed a custom collision system for various shapes, including planes and spheres
- Implemented diffusion lighting supporting up to three light sources

Relevant Tool/Skill: C#, Unity, Git, Github

68K Disassembler, Hardware and Computer Organization April – June 2023

- Collaborated with 3 team members to design, structure, and implement the disassembler
- Built a disassembler capable of decoding Motorola 68000 instructions into a human-readable format
- Enhance scalability by separating the instruction-decoding subprogram into modular parts

Relevant Tool/Skill: Assembly, Data Structures
